

Care Coordinator

The Care Coordinator is a software application that incorporates your clinical pathways, disease management practices and guidelines. Enhance your health care delivery process and promote continuity of care to achieve your clinical, financial and organizational objectives.

| BENEFITS |
|--|
| Improve care giver efficiency by offering pathways for clinicians to follow |
| Increase staff effectiveness by reducing the number of home visits while improving clinical outcomes |
| Allow clinicians to have more productive time with the patients |
| Decrease the amount of paperwork with on-line documentation |
| Reduce claim denials through accurate and timely documentation |
| Standardize the practice, workflow, forms and reports |
| Can be used in conjunction with our remote patient monitoring application |

| FEATURES |
|--|
| Dashboard display of patient's condition |
| Patient and care giver Scheduler |
| Timely reminders of actions the case manager needs to perform |
| Form Generator – add your forms to our solution for ease of use |
| Physicians office staff can go on-line and complete "Office Visit" form |
| Real-time access to clinical notes from care team visits |
| Share data with all members of the care delivery team |
| Management Reports are available such as Quality Outcomes and Staff Productivity |
| Assign user rights |
| HL7 and HIPPA compliant |

The tool you need to bring your work flow process into a real-time shareable application is the Care Coordinator.
